FLLC “ZTE” collaborate with the design and installation company TSP-Engineering since 2010.

During the period of 2014-2015, TSP-Engineering participated in the projects “Turnkey Modernization of 2G SWAP with equipment support of LTE 1800 and WCDMA 900 for JSC "Mobile TeleSystems" (Test Area)", The development of Data Center solutions with the placement of data-processing equipment, The cache system of user traffic iCache, The data transport network of MTIS .

During the period of operation the company has proved itself as a reliable and professional partner.

We recommend TSP-engineering to work on the design of complex communication facilities and infrastructure.
